Did You Know?

Q: Why did the Son of God become man?

A: For us men and for our salvation, the Son of God became incarnate in the womb of the Virgin Mary by the power of the Holy Spirit. He did so to reconcile us sinners with God, to have us learn of God's infinite love, to be our model of holiness and to make us "partakers of the divine nature" (2 Peter 1:4).

7PM CONFESSIONS ON FIRST WEDNESDAYS

After trying a 7pm confession time on first Wednesdays on a trial basis, I have decided to continue offering confessions following the first-Wednesday men's group meetings but not to offer confessions on first Wednesdays apart from the men's group meetings. Other parishioners are still welcome to come to confessions when available following the men's group, but I will no longer be advertising this as a distinct time slot. -Fr. Schrader

FIRST COMMUNION

A group celebration of first Holy Communion is scheduled at St. Joseph for May 5 at 10:00am. Since we have St. Anthony children preparing for first Communion in a variety of ways (at St. Joseph school, at another school, homeschooling, PSR/CCD), I want to remind our families that you have options for celebrating first Communion.

When your child is ready for the sacrament, you are welcome to join the group first Communion at St. Joseph; you are welcome to organize a group celebration at St. Anthony; you are welcome to arrange for an individual date to celebrate first Communion. It is up to each family. I am willing to accommodate whatever works best for you with the celebration of this important sacrament. -Fr. Schrader

MASS INTENTIONS

While each Mass is offered in a general way for the needs of all the world and for the souls of the faithful departed, the priest offering the Mass can apply the specific fruits of that Mass for an intention of his choice. By ancient tradition, members of the faithful may request the priest to offer Mass for a specific intention of theirs. The code of Canon Law states that "A priest is free to apply the Mass for anyone, living or dead." (can.901)

It is also customary, though not absolutely required, for the faithful to make a donation to express their concrete connection with the offering of that particular Mass. In former times, this donation was often the things physically necessary to offer Mass (bread, wine) or other things required for the support of the clergy. Today, such a donation (a "Mass offering") is usually a small cash donation. In the Diocese of Jefferson City, the customary donation for a single Mass is \$10. In our diocese, these donations are given to the parish.

If you wish Mass to be offered for a specific intention and to make a donation in connection with this intention, please place an envelope marked "Mass intention" in the collection basket.

BLESSING OF FIELDS & FLOCKS (MAJOR ROGATION DAY) - APRIL 25

On April 25 at 6:00pm at St. Joseph (Westphalia), there will be a litany, penitential procession, and Fr. Schrader will offer a solemn blessing of the fields and flocks of all the surrounding countryside. "Rogation" means "asking." Since the late 400s, the Church has set aside certain days of the year to ask for God's blessing for crops and animals as well as deliverance from various evils. April 25 is the feast of St. Mark, when the Major Rogation for the year has traditionally been held. Please join us in prayer and procession on this day! Booklets with the prayers will be provided.

SHAPING OUR FUTURE TOGETHER

On March 26, 2024, Bishop McKnight signed a pastoral letter and formally promulgated plans for the five deaneries of our diocese. The letter and accompanying plans are available on the diocesan website: <https://diojeffcity.org/soft/>

St. Joseph and St. Anthony are in the Southeast Deanery.

NURSES' CORNER

Are Cockroaches Dangerous?

Cockroaches are considered to be harmful as an allergen source and asthma trigger. They may also carry certain bacteria and that can cause illnesses if left on food.

According to the CDC, cockroaches do not bite. They can, however, scratch you with their heavy leg spines. And because they carry bacteria, a cock roach scratch could potentially become infected.

According to the EPA (United States Environmental Agency), cockroaches carry bacteria that, if deposited on food, can cause salmonella, staphylococcus, and streptococcus.

According to the world Health organization (WHO), cockroaches have been known to play a role as carriers of intestinal diseases, such as dysentery, diarrhea, cholera, and typhoid fever.

In the article of 2012, published in the journal Allergy, Asthma & Immunology Research, cockroaches are one of the most common sources of indoor allergens.

It's thought that the enzymes found in the excrement, shedding body parts, eggs, and saliva of cockroaches causes cause allergic reactions in many people.

To deal with the cockroach allergy symptoms, your doctor may recommend over-the counter or prescription medications, such as: antihistamines, decongestions, nasal corticosteroid sprays. Prescription medications: cromolyn sodium, leukotriene receptor antagonists, and desensitization treatments. If you have asthma, your doctor may also prescribe bronchodilators or anti-inflammatory medication.

Along with professional extermination, you can reduce the cockroach population in your home by limiting their access to access to water, food, and shelter:

- Seal entry points such as cracks in floor and walls
- Fix leaky pipes
- Keep typically damp areas dry
- Use cockroach traps and bait
- Tightly cover all trash containers
- Clean pet food bowl (don't leave pet food out)
- Sweep up food crumbs from tables, counters, stovetops, and floors
- Wipe up spills immediately

- Vacuum and mop floors regularly
- Clean (at least annually) around and under furniture that is rarely moved
- Clear out clutter from storage closets, shelves, and drawers
